

Feel like your AR systems are stuck in the 19th century?

Welcome to a new way of doing business. From the moment you sit down with a potential new client until payment is safely received in your bank account, a million inefficiencies can crop up. Together they represent a significant reduction in your bottom line. **Order2Cash is the world's only end-to-end order to cash system that fully optimizes your entire AR process.** From pro-actively managing credit risk, through accelerating the invoicing process and minimizing your outstanding customer credit, Order2Cash protects your financial well being.

End to End Support for Complete Efficiency

Order2Cash covers the entire AR cycle from beginning to end. Our Contract2Sign module allows you to electronically sign and process proposals and contracts. Once the deal has been signed Invoice2Deliver offers the world's most powerful e-invoicing solution. Accept2Pay allows you to receive payments from around the globe and Credit2Control incorporates an enterprise level credit management solution. Finally Cash2Match is able to automatically reconcile 90% of all payments automatically, thus eliminating costly manual procedures.

All of these solutions are available online and are suitable for enterprise level companies.

Fully Integrated with ERPs, B2B and B2G Networks

As large enterprises have adopted procure-to-pay P2P systems, they have largely shifted the burden of integration onto the backs of their suppliers. Thus, many companies are faced with the need of implementing and maintaining multiple integrations with different third party invoicing networks. Order2Cash solves this problem.

Thanks to our open architecture our customers can enjoy "flip of a switch" integration with over 700 distinct ERP systems and third party networks. Order2Cash is fully VAT compliant and simplifies international expansion.

Order2Cash at a glance

- Streamlines your entire AR process
- Digitizes and accelerates your contract workflows
- Fully integrated with over 700 ERP systems and 3rd party networks.
- Fully compliant global e-invoicing solution
- Flexible multi-currency payment options.
- Feature-rich enterprise Credit Management solution
- Automatic payment reconciliation system
- Proven in Fortune 500 installations around the globe

Order2Cash truly adds value.

Our studies have shown that most companies lose between 2 and 5% of their gross margins due to inefficiencies in their order to cash cycle.

Our SAAS solutions allow you to recover these reductions in profitability.

CREDIT RISK MANAGEMENT

Order2Cash not only provides self-sourced credit risk data for existing customers, we also incorporate credit evaluation data into the product so that you can be proactive when closing sales.

E-CONTRACT WORKFLOW

Closing the deal and getting your paperwork in order should not slow down your business.

Contract2Sign allows you to streamline your deal flow while maintaining full legal compliance.

E-INVOCING

Our **Invoice2Deliver** platform is one of the world's leading outbound e-invoicing systems. Not only do we provide you with a proven and

completely streamlined process, but we enable you to configure personalized delivery channels per client. Integration with 3rd party networks is as easy as flipping a switch.

PAYMENT PROCESSING

Accept2Pay enables you to accept payment using local currencies and payment methods from around the globe at highly competitive rates.

CREDIT MANAGEMENT

Credit2Control closes the order to cash cycle by providing an enterprise-class credit management system based on personalized workflows. Meanwhile **Cash2Match** automatically processes and reconciles payments using a proprietary algorithm.

Easy integration

Our Order2Cash software can easily be integrated into your corporate environment. Our SAAS model assures that you'll always have the most recent version the software, receiving any updates automatically.

Our service

We understand that our software forms an important link in your management processes. That's why we are totally dedicated to your satisfaction. We consider ourselves as your integrated order-to-cash partner, and we behave as such.

Order2Cash is the only fully integrated system that streamlines internal processes, connects with clients and external networks while guaranteeing global AR compliance.
