

“Our platform offers everything you need to control costs, boost cashflow and improve customer satisfaction.”

Frank Hoekstra, CEO Order2Cash

Order2Cash is the key to unlocking your digital transformation

Your business moves fast. Can your finance department keep up? Empower them with the #1 ranked global order to cash automation platform. Our innovative, modular SaaS solution offers true end-to-end support for receivables management. Make the switch and improve your business performance in record time.

Reduce costs and accelerate payment cycles.

- Optimize AR processes, receive faster payments, reduce DSO.
- Consolidate all departments, all processes through a single supplier contract.
- Eliminate data silos. Connect all entities and datasets through a single platform.

Fast, easy implementation. Minimal IT investment.

- Move your process online in 1-4 months.
- Seamless connectivity to any ERP system (SAP, Oracle, Infor, etc.)

A single platform to manage your entire order to cash cycle

- Credit Checks & Customer Assessment
- Secure Digital Contract Signing
- e-Invoicing and Online Payments
- Cash Allocation
- Credit Management & Collections
- Business Intelligence

The #1 global order to cash automation platform

Global Invoice Delivery. Local Compliance.

- Invoice anywhere, anytime, via any channel or delivery format.
- Guaranteed compliance with all local tax regulations (including VAT).
- Offer receivers a 24/7 online archive of all invoices and other documentation, including those sent via traditional print channels.

Unparalleled Interoperability.

- Connect with any AP or B2G invoicing network (e.g. Ariba, Tradeshift, Tungsten Network).
- Fulfill all governmental invoicing mandates.

Monitor your cashflow in a heartbeat.

- Get paid quicker by supporting international payment methods.
- Benefit from automated reconciliation to increase bookkeeping accuracy.
- View a complete audit trail for every order, with real-time tracking updates.
- Eliminate costly human errors. No more missing invoices.

Serve customers better. Improve retention rates.

- Adopt proactive credit management workflows to control every touch point with your customers and debtors.
- Monitor, maintain and execute all dunning and collections activity from one dashboard.
- Build comprehensive debtor profiles with extensive reporting capabilities for deep-dive analysis.
- Find greater efficiency with auto-suggested tasks and embedded decision-making tools.
- Make forecasting easy and accurate. Utilize behavioral data to shape future decision models and overall credit policy.
