

A fast, secure way
to send and
retrieve contracts.

Get business moving faster with a digital contracting workflow.

How long do you wait, on average, for a contract to be signed and returned? A few days, a week, a month? Perhaps longer? Whatever answer you gave, that time frame is probably lengthier than you would think is ideal. How do you change that? The answer is simple: move your contracting processes online with Order2Cash and you can turnaround a completed contract in minutes, even when multiple signatures are required.

Get your deals off the start line quicker.

Your deal has been agreed. The customer wants to do business and so do you. It's time to get things moving. So why do you still insist on following an out-dated contracting process?

It's time to leave the traditional print and ink method behind for good. Implementing a digital contracting process can truly revolutionize the pace of your business and get your deals moving forwards much more rapidly.

Contracting is a key element of your day-to-day business. It can act as the launch point for your full order to cash process but needless delays in that process can breed frustration and dissatisfaction on both sides of the contracting table.

Order2Cash can help you to eliminate that frustration and truly accelerate the overall pace of your business.

Move faster. Succeed better.

- 24/7 availability
- Intuitive signing procedures
- Supports more than 10 signees per document
- Real-time status tracking via webservice
- SMS/Email validation options per signee
- Multiple language support

A fast, secure and easy way to send and retrieve contracts.

Use our secure digital contract signing solution to authenticate, sign, distribute and store customer or supplier contracts and other documentation online. Tailor e-Signing processes to match your internal business workflows and controls. Monitor the status of every document through your online dashboard and respond to any delays or requested adjustments from customers quickly and efficiently. Accelerating your complete contracting workflow with Order2Cash will enable you to act faster, become more transparent and meet customer expectations.

Suitable for a range of document types.

Our solution has been designed to work with any type of document; whether they require a single or multiple signatures. The software is powered by the strongest electronic signature software available, enabling you to do business globally with ease. We provide you with a robust and intuitive B2B online signing service that uses cutting edge technology and complies with all legal, privacy and security regulations.

Use our solution for all your documentation, including:

- Contracts
- Partner Agreements
- Lease Agreements
- Expense sheets
- Work Orders
- NDA's
- SLA's

Accelerate your complete contract workflow.

Our solution utilises a digital workflow and approval steps that are totally transparent and traceable. Electronic documents are delivered across the channels you designate, making signing easy and painless for your customers. Key checkpoints ensure that contracts are validated before being sent to customers, while digital signatures authenticate documents and enforce the legal status.
